

Fans suitable for almost all types of floor convectors, they are extremely quiet and distribute heat quickly and evenly.

If you have floor convectors without a fan and you are not satisfied with their performance, our fans will add up to 500% of the heat output to your convector.

### **TECHNICAL PARAMETERS**

- Left or right connection
- Safe power supply: 24V DC
- Length: 55 cm, 72 cm, 92 cm, 120 cm, 140 cm
- Power consumption at min. speed: 2 W
- Noise level: 22-35 dBA
- Width and height :60 x 60 mm
- Remote control
- 3 speeds

The renovation kit always includes one or two Elsymco fans (according to convector length) with electronic control, thermostat, power supply and remote speed control.

- Easy installation without building modifications
- Trouble-free operation
- Long service life
- Increases the heating output by up to 500%

### **SOLUTION FOR CONVECTOR WITHOUT FAN**

If you have floor convectors without a fan and you are not satisfied with their performance, our fans will add up to 500% of the heat output to your convector.

You don't have to worry about increased electricity consumption, because our fans use less electricity than your switched-off TV during standard operation.

Our fans will surprise you with unusually low noise at maximum speed during the day, you will not hear them at minimum speed at night.

### **SOLUTION FOR CONVECTOR WITH UNSATISFACTORY FAN**

If you are worried about the noise and poor performance of your fans in convectors, choose Elsymco fans.

It delivers a 50-200% performance increase compared to your existing fan, with significantly less noise and lower power consumption.

From the Czech manufacturer of the quietest and most economical fans in the world.
